

ANJALI NAIR

Summary

I am an enthusiastic first-year BSc (Hons) Artificial Intelligence student at Liverpool Hope University with a strong interest in technology and cybersecurity. I completed my early schooling in India before moving to the UK in 2023, where I finished my A levels in Computer Science, Biology, and Psychology.

I have a solid background in leadership and teamwork through my time in the Army Cadets in both India and the UK, where I received top student medals and later became a Cadet Instructor. I have also completed the CyberFirst Defenders and Advanced courses, which strengthened my skills in cybersecurity.

Alongside my studies, I have built professional experience at McDonald's, starting as a Crew Member and progressing to Crew Trainer and now Shift Manager. This role has helped me develop strong communication, problem-solving, and team management skills.

I am motivated, adaptable, and eager to apply my growing knowledge in AI and technology to new opportunities.
